

# ASSEMBLY INSTRUCTIONS

1

Fasten the end cap onto the table.

2

Screw together the pipes that have threading on them.

3

Thread the banner onto the threaded pipes you just assembled, making sure that both pipes have the same piece on top. Fasten the two 90° elbows on top of each pipe.

4

Fasten the three-way elbow onto the third and last of the threaded pipes you assembled.

5

Connect one of the 90° elbows with the three-way elbow using one of the pipes, and connect these again to the other 90° elbow using the last pipe.

6

The last pipe slides in easy if you use the right technique. Simply tilt the standing piece a bit, and use your foot to force it back up again.

7

The prayer station should now look like this.

8

Fasten the prayer station banner to the table. Put the two back pieces in first, and fasten the front piece last.

9

Great job! Your Prayer Station is ready to go!
